

AM Health and Safety Inc., AIHA-Pittsburgh Local Section, and SKC Inc.
are pleased to present:

Industrial Hygiene Professional Development: The Short Course on Occupational Noise Exposure Measurement

SKC Inc. instructors have extensive experience in the field of occupational noise. This noise seminar has been well received in various parts of the country and is an excellent introductory course to dosimetry or a refresher for professionals who have been away from performing occupational noise surveys. It is also a great update on new dosimeters and their capabilities and benefits.

What you will learn

An intensive short course on occupational noise exposure with hands-on instruction using new technology for measurement and assessment. The attendee will be introduced to the basics of Hearing Conservation with additional instruction in basic sound measurement techniques and the use of sound level meters.

What we will cover

- Physics of Sound
- Introduction to Hearing Conservation
- Basic Noise Measurements
- Occupational Noise
- Government Noise Regulations
- Conducting Noise Dosimeter Studies
- Understanding Key Noise Dosimetry Terms
- Hands-on Exercises with Noise Dosimeters
- Hands-on Exercises with Sound Level Meters

Who should attend

- Industrial Hygienists
- Safety Professionals
- Occupational Hearing Conservationists
- Noise Consultants
- Industrial Engineers
- Plant Engineers
- Government Noise Specialists
- Sound Instrument Technicians
- Occupational Health Professionals

Register Today!

Register online through the Pittsburgh AIHA website:
<https://www.pittsburghaiha.org>

Enrollment is limited to 30 attendees to afford everyone an opportunity for hands-on work with sound level meters and noise dosimeters used in the seminar.

When

June 22, 2022

Where

AM Health and Safety, Inc.
177 Campbells Run Road
Pittsburgh, PA 15205

Cost to Attend

\$35 Pittsburgh AIHA Member
\$50 Non-member
\$20 Student (sponsorships available)

Fee includes continental breakfast, lunch, and all course materials.
